Digital Guitar Interface for Mac & Windows Devices Capture the warmth and richness of your guitar's tone with digital purity using one simple 'take-anywhere' device, Apogee JAM 96k for Mac & Windows.

Electric Guitar JAM is designed to capture the true tone and warmth of electric guitars.. Sean McArthur, Apogee's Director of Marketing, told us, 'The original JAM was launched in 2011 and was wildly successful.. PureDIGITAL means no noise, just great guitar tone JAM's special circuitry is optimized to make the amps and effects in any guitar or music creation app sound their best.. Perfect for any playing style and genre of music, JAM lets you record, practice, and jam with the authentic sound and responsive feel of a classic tube amp.

You will notice the sonic difference between JAM and other similar products immediately.

PureDIGITAL means no noise, just great guitar tone Its special circuitry is optimized to make the amps and effects in any guitar or music creation app sound their best.. We are excited to offer these high-performance products to Windows customers,' he continued.. There are three models of JAM; The original JAM for iPad and Mac, JAM 96k for iPad and Mac and the new JAM 96k for Windows and Mac.

'Here's what Apogee has to say about this new product: JAM 96k is a premium digital converter and instrument preamp featuring Apogee's PureDIGITAL technology.. Digital Guitar Interface for iPhone, iPad, Mac and Windows Apogee JAM is a USB audio interface that lets you connect a guitar to your iPad®, iPhone®, Mac or Windows 10 PC and record with Apogee's legendary sound quality.. JAM is built for GarageBand and Logic Pro but works great with just about any app you choose.. The JAM 96k delivers your next great performance to your Mac & Windows devices whether you're at home, on-the-go, or in the most advanced recording studio.. Dynamic Microphones While JAM is optimized for electric instruments such as guitar and bass, you can record vocals, acoustic instruments, or even your guitar amp by connecting a microphone such as an SM58 to JAM.. They describe JAM 96k as a professional 96kHz, 24-bit USB guitar input that makes it easy to connect your guitar directly to your Windows or Mac computer.
