

[My Mac Is Suddenly Slower With An App](#)

A screenshot of the macOS Activity Monitor application. The title bar reads "Activity Monitor (My Processes)". The "CPU" tab is selected. A search bar at the top right contains the text "photos". The main area displays a table of processes. Below the table, there is a summary section with system statistics and a CPU load graph.

Process Name	% CPU	CPU Time	Threads	Idle Wake Ups	PID	User
com.apple.CloudPhotosConfiguration	0.0	0.08	4	0	34468	
Photos Agent	0.0	1:44.38	10	0	34471	
com.apple.photos.ImageConversionService	0.0	45.38	2	0	34476	
com.apple.ICPPhotoStreamLibraryService	0.0	4.64	2	0	34474	

System:	8.72%	CPU LOAD	Threads:	1636
User:	8.77%		Processes:	335
Idle:	82.51%

It's just that Macs remain healthy for much longer than Windows computers They have smart built-in options that prevent the hard drive from getting full really quickly.

“Suddenly, my super Mac turned extremely slow What is it all about?” It makes sense that just like any computer in the world, Apple computer runs slower over time.
